Email 2 SMS

Quick Facts

- SMS can be sent as easily as an email
- Works with any email client
- Incoming SMS is received as an email in your inbox
- Easily allows for developers intergration
- Full Reporting available online

Designed mainly for Developers, Email 2 SMS allows you to send an email from within an application, or from any email client, to your personal Email 2 SMS address.

The email is then received and converted into an SMS and sent.

SMS replies are delivered back to an Email address of your choice.

You can send multiple SMS at a time, with the SMS message in the body of the email, and the cell numbers in the subject line.

Volumes

A few hundred to hundreds of thousands a month.

Networks

We send to South African networks as well as all International destinations.
